CERTIFICATE OF EXCELLENCE

İsmail Emir İpek

successfully graduated

Python Pro course

(Consists of 48 hours* and 32 classes)

Took 1st place in the group.

studying time: 21.07.24 - 09.03.25

Founder of Kodland
A.Nosulich

Python pro

kodland

🕒 The course's duration: 32 lessons (2880 min)

💻 Learning program:

- module 1

A Discord Bot that Works Without Weekends. (540 min).

Result: The students will create their own open-source bots that can help young Discord users!
- module 2

Websites and clouds. Let's learn what back-end development is all about! (900 min)

Result: The students will create their own websites that will help them monetise and promote their projects.
- module 3

Mastering the AI! Let's teach the machine to think and see! Learn what interactive Python is and how to get results here and now. (720 min)

Result: The students will identify the problem themselves, propose a solution, and train their own artificial intelligence models designed to solve it.
- module 4

AI is everywhere! Integrating AI into ready-made applications (360 min)

Result: The students will replace an algorithm in one of their projects with artificial intelligence.
- module 5

Hackathon: Coding and solving the problem of global warming! (360 min)

Result: The students will independently propose a solution to a given problem, implementing the said solution in any of the available ways.

✅ Completed projects

- Discord-bot translator
- Discord-bot password generator
- Discord bot for sending memes
- Discord bot to solve the problem of environmental pollution
- Website calculator for smart home
- A web service for creating memes
- Website for keeping personal records
- Portfolio website

Python pro

kodland

🕒 The course's duration: 32 lessons (2880 min)

- Intelligent Photoshop
- Script for analyzing news in the world of technology
- Service for identifying bird species by photo
- Artificial intelligence model for solving your daily task
- Discord bot with AI
- Website with AI
- Final project (360 min)

🧩 Developed Hard skills

Python

- 1 Fundamental Language Structures (Advanced)
 - Lambda functions and generators
 - File handling
 - Exceptions Handling

2 OOP

- Classes and objects
- Methods

3 Libraries

- Installing Libraries
- Fundamentals of library syntax
- Working with Library Documentation

4 Working with API

5 PEP-8

Project Management

1 Working with the IDEs

- Installing and configuring an IDE
- Creating a new project

2 Version control and management system

- Creating and setting up a GitHub account

Python pro

kodland

🕒 The course's duration: 32 lessons (2880 min)

- GitHub Web Interface
- Integration with the IDEs
- Basic commands: commit/push/pull

Artificial Intelligence and Machine Learning

- Fundamentals of Machine Learning

Web development

- 1 Basics of layout
 - Creating and modifying simple HTML templates

Fundamentals of Graphic Design

- UI/UX design

🔗 Developed Soft Skills:

- 1 Communication skills
 - Effective feedback
 - Establishing teamwork-oriented relationships with peers

- Learning to promote ideas

2 Teamwork

- Learning to divide responsibilities within a team
- Learning team formation and effective cooperation

3 Critical Thinking

- The ability to analyse information
- The focus on conscious decision making
- The ability to work with unstructured information
- The development of logical and abstract thinking

4 Time and project management

- Task decomposition
- Planning
- Resource Management
